Description

Purpose or significance of data

Revitalization Area eligibility was determined by comparing the block group's median household income and home ownership rate to the respective rates of the surrounding area. If the block group is located in a CBSA Metropolitan Area then the metro area was used. If the block group was non-metro then the state rates were used. Also included are several variables relating to REO and FHA activity in the block group including average REO sales price over the last 12 months, 90-day FHA defaults, 90-day FHA defaults in foreclosure, active FHA-insured single family loans, active REO properties, and a 2-year history of REO closings. Data for owner occupied housing units provided by 2010 Census SF1. Data for median household income and home ownership rate provided by American Community Survey 5-year (2007-2011). Data for HUD single family FHA loans and REO provided by the Single Family Data Warehouse.

- ☐ Do not harvest. All data is small, unstructured, and on a page crawlable by the Internet Archive.
- ☐ Page contains dynamic content (e.g., links loaded by JavaScript).
- ☐ Page contains interactive visualizations.
- ☒ Data is accessible in structured file(s) that can be directly downloaded.
- ☐ Data is accessible over FTP.
- ☐ Data is accessible using a documented public API.
- ☐ Data is only accessible using search queries in a web form.

Recommended approach to harvesting data

manual download

File formats

xlsx, shape files
