Description

Purpose or significance of data

This study is "to assess the potential sea level rise (SLR) and storm surge risks to energy assets in major Metropolitan Statistical Areas (MSA) for specific cities in the United States."
It used data sets from <https://coast.noaa.gov/slrdata/>, including a range of plausible trajectories of global mean SLR.

- Do not harvest. All data is small, unstructured, and on a page crawlable by the Internet Archive.
- Page contains dynamic content (e.g., links loaded by JavaScript).
- Page contains interactive visualizations.
- Data is accessible in structured file(s) that can be directly downloaded.
- Data is accessible over FTP.
- Data is accessible using a documented public API.
- Data is only accessible using search queries in a web form.

Recommended approach to harvesting data
